

# LOVE UNDER THE RAINBOW

JODIE SWEETIN, DAVID HAYDN-JONES & DAKOTA GUPPY

**D**o you believe in fate? For Lucy Newbern, ever since she was young, she's had a book of her dream man and dream family all planned out - except now, she's a single 3rd grade teacher who spends all her free time pining over Max Peters, a guy who just doesn't get her... Ever heard of unrequited love? Yeah, Lucy has, too. Enter single father, Jack Evans, a new doctor in town, and his optimistic daughter, Sophie, a new student in Lucy's class. Jack promised Sophie by moving to the rainiest town in America, they would finally have time to chase real rainbows, as she's always dreamed, except being a busy doctor, nothing has changed. Lucy suggests Sophie create rainbows for the school science fair. If they win, they get a class field trip...chasing real rainbows!

When Sophie wins the science fair and doesn't find a real pot of gold, we discover her secret - she just wants a real family. Sophie believed her mom, who crossed the rainbow bridge, would be on the other side and that would make her dad happy. Lucy helps Sophie and Jack see the real pot of gold: That maybe the rainbow has been pointing them to each other all along; a second chance at a family.
